 live beautifully

a visit to the old world

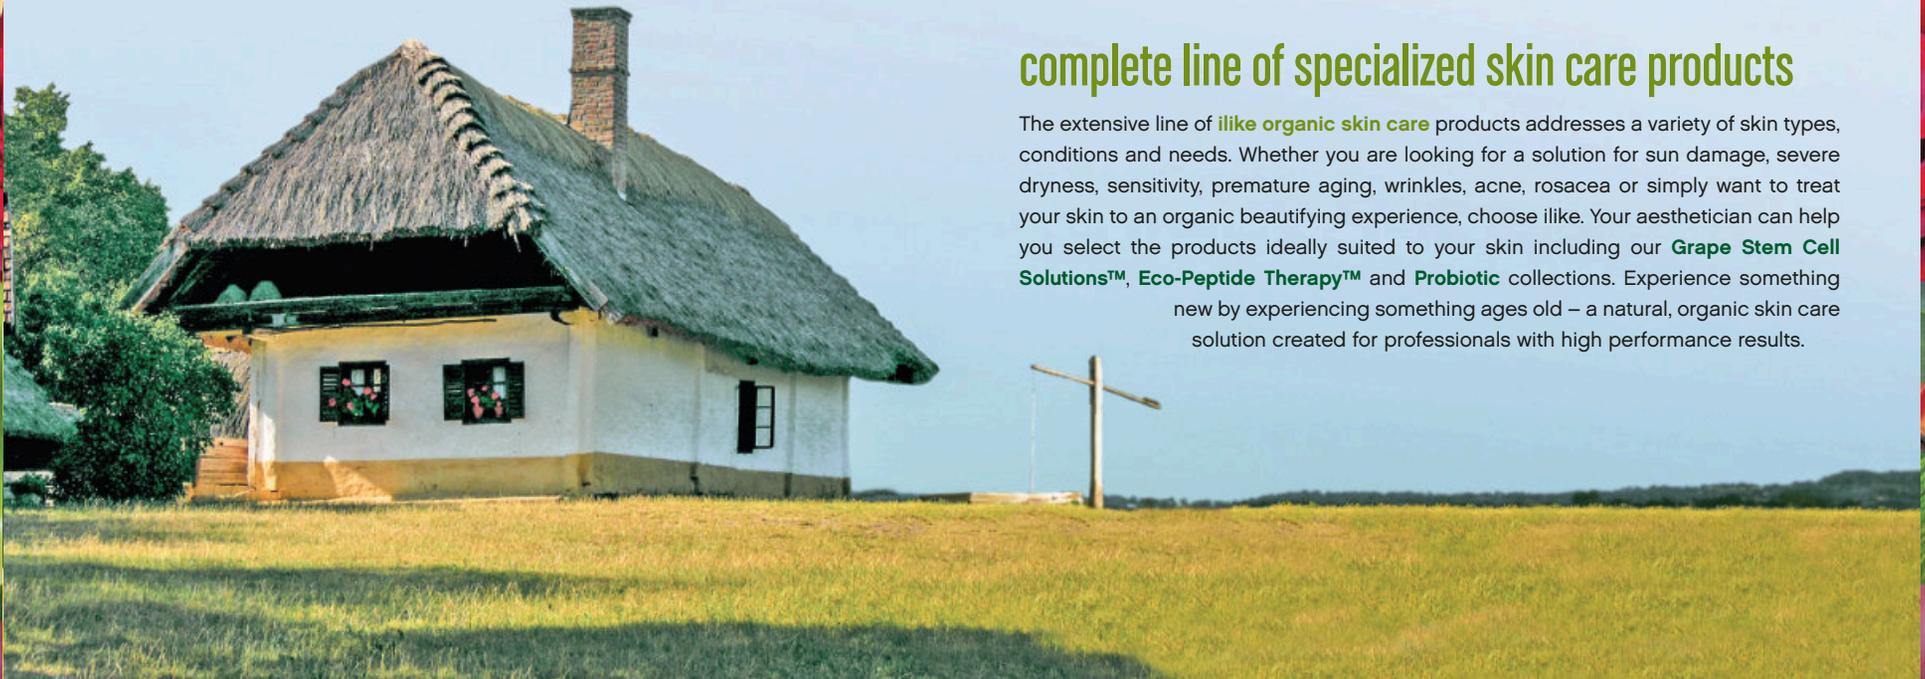

Hungary – a land blessed with fruits, vegetables and herbs that draw their succulence from the soil and thermal hot springs of the Carpathian basin long known for being rich in minerals and trace elements found nowhere else on earth.

A country in Eastern Europe with a long history of using locally available ingredients in their healing treatments. Due to the soil, the somewhat dry climate, and abundance of sunshine, herbs and fruits grown in Hungary have high concentrations of active ingredients and aromatic agents. From these ingredients a woman named Ilike Molnar, lovingly known as “Aunt Ilike” (i-lee-ke) began creating organic skin care products since the late 50’s. She believed, as her grandmother the village herbalist taught her, that what we need to maintain health and beauty with resources that can be drawn from nature around us.

From this heritage come the professional products of **ilike organic skin care** from **Szép Élet**, made in small batches from organically grown and handpicked herbs, fruits and vegetables, containing the highest possible levels of organic active ingredients. For over 60 years in practice and through extensive research these potent, natural ingredients have demonstrated their therapeutic and beautifying effects resulting in clear, balanced and glowing complexions.

ilike organic skin care philosophy

Nature provides an abundance of solutions for our everyday needs – that was **Aunt Ilike’s** philosophy when she created these products and it is the philosophy of **ilike organic skin care** and **Szép Élet**. Our fruit, vegetable and herbal ingredients are formulated and processed in a unique way that maintains the vitality of the natural active ingredients. Because of this process you can immediately experience the rich, deep penetrating effects of our products, as well as their magnificent aromas and colors. We use the power of handmade pulps versus commercial extracts, because pulps retain the full concentration of the herbal ingredients in their natural form for better penetration.

Every **ilike** product is full of vitamins, fruit acids, bioflavonoids and other antioxidants that treat, nourish and beautify the skin from the inside out. You will instantly notice the difference between **ilike** and other skin care lines.

taking care of your skin

What many do not realize is that the skin is the body's largest organ, and nutrient absorption through the skin is between 60-100%. (Think of your skin as a sponge!) We often take for granted the amazing powers of our skin to protect us while enduring the elements. But it is important that we care for our skin just as it cares for us.

3 step daily skin care regimen

- twice per day, a.m. and p.m.

To maintain the health and vitality of your skin follow our easy 3 step daily regimen:

- step 1: cleansing step
- step 2: toning
- step 3: vitamin supplement/moisturizing

5 step weekly skin care regimen

- once or twice per week

Supplement your daily regimen with exfoliator and mask:

- step 1: cleansing
- step 2: toning
- step 3: exfoliating
- step 4: treating
- step 5: vitamin supplement/moisturizing

cleansing

Cleansers remove makeup and environmental impurities from the surface of the skin. Cleansing milks from **ilike organic skin care** not only clean your skin but also hydrate, revitalize and invigorate leaving a radiant, silky and healthy complexion. The cleansing milks also double as eye makeup removers.

Directions: Apply a small amount of cleansing milk suited to your skin type over entire face and neck area and massage it in gently for 30-60 seconds moving your fingertips in circular motions, then wipe off with damp face towel or cotton pad.

Exfoliating washes from **ilike organic skin care** soften and lightly exfoliate, which remove dead skin cells, which enables the skin to self-purify and allows more effective absorption of other skin care products. These cleansing concentrates provide a gentle and convenient light daily exfoliation as part of a daily skin regimen and are especially effective for specific skin conditions.

Directions: Mix a small amount of exfoliating wash with water in hands. Apply and massage into skin with fingertips for 1-3 minutes in a circular motion covering the entire face and neck and avoiding the eye area. Remove completely with damp face towel. Use 1-2 times a day. Use also on the entire body as a shower gel, or to treat problem areas of the back, décolleté or scalp.

toning

Toners refresh the skin and remove excess impurities. Toning is also important to balance the natural pH of your skin and to infuse it with vitamins and minerals. Skin will be rejuvenated, pores will be evened for better moisture absorption. The ilike organic skin care toners contain organic herbs that not only balance but also revitalize the skin with vitamins and minerals.

Directions: To hydrate: simply spray toner to the skin several times a day. To cleanse: apply toner over entire cleansed skin surface with a cotton pad and leave on. Use twice a day after cleansing or mask or anytime your skin needs to be refreshed.

exfoliating

Exfoliation brings vibrancy and smoothness to the skin. Regular exfoliation removes the build-up of the hard keratin layer, allows better absorption of other skin care products and makes skin clear and even. For mature skin, exfoliation helps remove dry flakes, revive fatigued skin and reduce fine lines.

Directions: Apply a thin layer of exfoliator to your skin after cleansing and leave on for 10-15 minutes for optimal results. Gently scrub off with a damp face towel or rub off with your fingertips.

treating

Regular use of a facial mask improves the health and elasticity of skin and can be used to control dryness, oiliness, acne, rosacea or other skin conditions. Masks and special treatments from **ilike organic skin care** contain high amounts of vitamins and concentrated ingredients rich in nutrients such as stem cells, hyaluronic acid, bioflavonoids, polyphenols, fructose, pectins and phytoestrogens. Our masks are as varied and uniquely crafted as our moisturizers.

Directions: Apply to cleansed skin over entire face and neck area and leave on for 15-20 minutes for optimal results. Remove with a damp face towel. Use 1-2 times per week or as otherwise directed. Exfoliation increases the effect of masks.

serums - supplements targeting specific skin needs or conditions

Serums and oil concentrates are nutrient supplements that Europeans have used for generations to address specific skin conditions or boost the vitamin level of the skin. Due to the high herbal active ingredient concentration, only a small amount is needed for the treatment of conditions such as acne, rosacea, imbalanced sebum production,

fine lines and wrinkles or lack of elasticity. The liposome molecules of our serums aid the active ingredient absorption into the skin. For drier skin:

Our herbal oils have very high levels of Vitamin E, so they not only protect and regenerate the skin, but also compensate the lipid film deficiency and decrease inflammation as well.

Directions: After cleansing and toning apply serum and massage in with circular motions on entire face and neck area avoiding the eyes. Apply moisturizer over serum. For oilier skin: Apply serum as a cream substitute in the summer or under very humid weather conditions. For dryer skin: Use a couple drops of ilike herbal oils to enrich your moisturizer.

moisturizing

Moisturizers hydrate and soften skin. Even oily skin needs a light moisturizer to maintain softness and suppleness, or prevent increased sebum production. Select from a range of ilike moisturizers created for specific skin types and conditions.

- 🌿 **Whipped Moisturizers** have fruits and herbs with an acidic pH maintaining the acidic environment, in which herbal ingredients can be activated effectively. These fine, light creams require only a small amount for use on specific conditions or for the maintenance of flawless skin.
- 🌿 **Moisturizers** are slightly richer with a pH level close to neutral.
- 🌿 **Rich Moisturizers** are created with high herbal oil content for the treatment of oil deficient skin.

Directions: Apply a thin layer of moisturizer over entire face and neck area after cleansing and toning skin. Enrich moisturizer with one of our oil concentrates to achieve an even more radiant complexion. Use it as a final step of your daily regime in the morning and the evening. Moisturizers and rich moisturizers might be used as night creams for most skin types. Rich moisturizers are suitable to reduce the appearance of fine lines or treat lack of elasticity and even prevent stretch marks (eg. during pregnancy).

eye treatments

It is never too early or too late to start caring for those fine lines. The sooner you start a preventative skin care regimen, the greater the result that can be achieved. Our unique herbal blends are designed to address the special needs of the delicate eye area.

Directions: Apply a small amount of cream around your eyes with a gentle tapping motion against the wrinkle lines (do not pull the delicate skin). Use as a final step of your daily skin care regimen in the morning and the evening. Use the eye creams twice daily.

body lotions and body oils

The skin of your body ages as well, and it deserves to be cared for just as your face does. You can find a solution for age spots or hyperpigmentation, even cellulite and other elasticity problems. Use one of our ilike organic skin care body lotions or body oils to firm, hydrate, nurture, soothe and revitalize your skin after every bath or shower.

Directions: Apply body lotion or body oil suited to your skin type to clean skin and massage it in. Use twice daily or after every shower or bath. Body oils can also be used for massages.

body wraps

The high performance results of ilike organic skin care products extends to the body treatments ilike offers to its spa therapist partners. With a wide variety of body wraps and scrubs, whether you like to hydrate, firm, soothe, calm, rejuvenate, regenerate or simply pamper your skin with vitamins, antioxidants and herbal oils.

massage creams

The ilike organic skin care spa therapists can choose between two massage creams during their service for different purposes, whether they want to soften the skin, open pores and emulsify sebum before extractions (**Saponaria and Linaria Massage Cream** for desincrustation), or nourish the skin with vitamins and nutrients while providing the right amount of slip (**Carotene Massage Cream** for regenerating, rejuvenating massage of face or body).

Rose + Hydration = Better Skin

HydroTone™ Rose Collection

The combined efficacy of **Red Rose Petals**, **Hydrolyzed Glycosaminoglycan** and **Sodium PCA** is proven by the clinical studies of our **HydroTone™ Rose Collection**.

These powerful moisture boosting ingredients **improve** the production of collagen and elastin, hence develop and repair the skin barrier. They **lessen** the length, number, area, and depth of wrinkles. The collection also helps in **reducing** free radical activity in the skin that causes premature aging.
